

County Plan #	Objective Title	Objective	Target
#232	MAT Services	By December 2022, Health Services will stand up at least one new Medication-Assisted Treatment (MAT) site after a comprehensive analysis of the local provider network.	1
<b>Measurement</b>			
Conducted measurement of baseline number of MAT sites in Santa Cruz County. After baseline was established we evaluated possible site locations and increased value by one additional site.			
<b>Collection Method</b>			
Identification of key stakeholders, sectors and MAT access points in Santa Cruz County to quantify baseline measurement. Conducted mapping session to identify sectors that could benefit from MAT access. Determined Psychiatric Health Facility was an ideal location to stand up new MAT site and this was completed. This is an important site because it allows for persons with mild to severe co-occurring disorders to have their mental health and substance use disorders treated at the same time which is an empirically based best practice for the treatment of co-occurring disorders.			
<b>Data</b>			
Year	Number of MAT Sites		
2021	11		
2022	12		
Increase from Baseline	1 site
